Product Information

• *This product can only be used up to PN 1MPa (10g/cm², 10 Bar). It should only be filled with water, and at a temperature below 100 °C (212°F).*

• *If the temperature exceeds 48 °C (or 120 °F), please show a warning sign near the product to avoid burning and scolding accidents.*

• *This Product is only suitable for use on indirect or sealed central heating systems including combination boilers.*

To ensure you can enjoy your radiator for as long as possible, it is essential you first **FLUSH YOUR HEATING SYSTEM WITH A CENTRAL HEATING CLEANSER**, this will clear any waste from the system. Following the cleansing of the system you must **PROTECT THE SYSTEM WITH A CENTRAL HEATING INHIBITOR**. These two simple steps will greatly increase the efficiency and lifespan of your central heating system. Failure to complete these steps increases the chance of pinhole leaks, and will also invalidate the guarantee on your radiator.

Safety & General Information

Please read carefully...

Do not throw away packaging until you have located and confirmed that you have all included parts.

This radiator must be installed by a qualified plumber or other fully competent person.

Inspect the finish on the product for signs of damage before installation.

The provided fixings are for solid brick walls only, if installing on any other surface please check that it will safely support the product and purchase suitable fixings.

Valve installation advice:

Please ensure that your radiator valves are fitted as per the below diagrams ensuring that a bleed point always remains at the top of the radiator.

For further information on installing your radiator valves, please consult the instructions provided with them.
